Weekly clearance rate, combined capital cities

Volumes across the auction markets are continuing to ramp up from the seasonal slowdown, but total auctions remain low compared with late last year, with 453 auctions held across the capital city markets. The preliminary auction clearance rate was recorded at 63.3 per cent across the combined capital cities. Despite the low number of auctions, clearance rates have continued to be high across the key auctions markets of Melbourne and Sydney. In Melbourne this week, the preliminary auction clearance rate was recorded at 78.3 per cent across 105 auctions while in Sydney the auction clearance rate was recorded at 76.5 per cent, with 120 auctions held in the city. At the same time one year ago, the auction clearance rate was recorded at 54.8 per cent and there were 413 capital city auctions held over the period. Auction numbers are anticipated to rise further over the coming weeks.

The rate of vendor discounting is the average percentage difference between the original listing price and the final selling price. The statistics are calculated across results received by RP Data over the past week and include properties transacted over the past four weeks. The data is based on private treaty sales only and records without a valid sale price have been excluded from the vendor discount analysis. The analysis also excludes results where there are less than 10 observations.
